

Make every action visible with

User activity monitoring (UAM)

Fast to deploy

Easy to scale

Monitor what matters

- ✓ Monitor only specific users or actions; exclude private apps/URLs
- ✓ Record users' screens and get searchable metadata — even offline
- ✓ Preserve privacy with pseudonymization and sensitive data masking

Prevent and stop threats

- ✓ Set custom alerts and response parameters
- ✓ Get real-time notifications on unusual activity
- ✓ Warn users, revoke access, or block suspicious actions

Advanced UAM

Get full visibility

- ✓ Control USB device connections across all endpoints
- ✓ Track keystrokes, commands, and clipboard use
- ✓ Monitor file uploads in messaging apps and browsers

Deliver actionable insights

- ✓ Generate over 30 types of detailed user activity reports
- ✓ Schedule reports for email delivery and use during audits
- ✓ View productivity, idle time, and app/web usage at a glance

The widest platform support available

UNIX

vmware®

CITRIX®

Why choose Syteca UAM?

Deploys fast — on-prem, SaaS, or hybrid

Scales to thousands of endpoints

Flexible, needs-based licensing

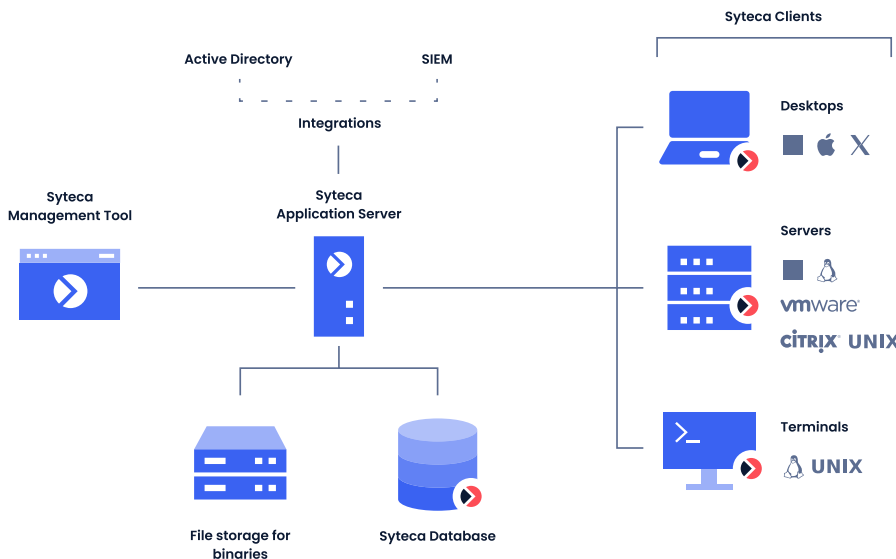

Low TCO, no hidden fees

Ensure compliance with the ISO 27001, PCI DSS, GDPR, NIS2, NIST, HIPAA, SWIFT, and more

How does it work?

Example of deployment:

Monitor every action on

- Physical desktops
- Virtual machines
- Remote computers
- Jump servers
- Corporate servers

Enterprise-ready solution

Vast integration options

with SIEMs, ticketing systems, and SSO

Multi-tenancy support

for managing separate offices or business units

High performance and scalability

with load balancing and flexible storage

Dedicated support

with 24/7 access and customer training

The choice of 1,500+ companies worldwide

"No surprise fees and nothing extra to install. Super straightforward."

"Support understood our case and helped set everything up quickly."
