

# Workforce Password Management

Protect secrets ■ Control access ■ Enhance security

## Smart, centralized credential management for modern teams

### Protect every account

with secret vaulting and role-based access controls

### Reduce manual workloads

for administrators with secure password sharing and rotation

### Empower your team

to access your organization's endpoints from anywhere

### Simplify IT compliance

by enforcing and automating security controls

## End-to-end management of the credential lifecycle

### Store securely

Keep all secrets and keys for privileged and regular accounts in an encrypted vault, enabling teams to access and manage them collaboratively.

### Control access

Specify who can access secrets and how they can utilize them. Set time-based restrictions and approval workflows for elevated credentials.

### Eliminate the risk of exposure

Enable users to launch connections locally or run RDP/SSH sessions in their browsers without revealing passwords.

### Rotate after use

Enforce single-user access to credentials with our password check-out feature. Automatically change passwords after each use.

## Secure secrets via

Windows local accounts

Web accounts

Active Directory accounts

Unix / Linux via SSH / Telnet

MS SQL accounts

## Advanced controls for stronger credential security

### Account discovery

Detect and onboard unmanaged privileged accounts across your AD, Azure, Windows, and Linux systems.

### Application credentials broker

Manage and inject credentials into applications via API or CLI without revealing passwords to users.

### MFA & SSO

Verify users with multi-factor authentication and integrate with your single sign-on identity provider.

### Audit-ready logs

Track every credential-related action — from usage to modification — for full visibility, security, and compliance.

## Why choose Syteca?

### Fast deployment

with easy setup and quick integration

### Flexible licensing

for companies of any size and need

### Predictable pricing

with low total costs and no hidden fees

### Dedicated assistance

with 24/7 support and customer training

### High performance and scalability

with load balancing and a variety of storage options

### Multi-tenant support

for isolated management of separate units

**Ensure compliance** with ISO 27001, PCI DSS, GDPR, NIS2, NIST, HIPAA, SWIFT, and more

## Deploy your way

### On-premises

for full control and customization

### Cloud

for easy scaling and low maintenance

### Hybrid

for flexibility and cost efficiency

## The choice of 1,500+ companies worldwide

"Honestly, Syteca is the first tool we've rolled out that didn't confuse people."

Head of infrastructure,  
healthcare company

"Auto-rotation saves us time and avoids mistakes."

Sysadmin,  
logistics company
