Real-time
sensitive data masking
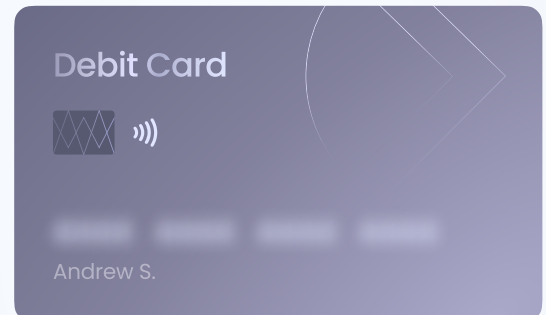

First-to-market innovation

Syteca

What it does

With the sensitive data masking feature, Syteca automatically detects and obscures confidential information (passwords, credit card numbers, Social Security Numbers, etc.) in monitored user sessions.

This allows you to monitor user activity without exposing protected information.

Debit Card

Andrew S.

How it works

01
Detects sensitive data using customizable regex rules.

02
Blurs only the detected value in screen captures.

03
Masks the entire active window if the exact field cannot be identified.

04
Replaces clipboard content and keystrokes with masked tokens.

Why it matters

Ensure compliance with the GDPR, PCI DSS, HIPAA, and other data privacy regulations.

Build employee trust and protect sensitive customer data.

Get defensible audit logs without exposing protected information.

Where it's essential

Financial services
Protect cardholder data and comply with PCI DSS.

Healthcare
Safeguard patient records and meet HIPAA requirements.

Government & public sector
Secure citizen identifiers such as SSNs.

Manufacturing & critical infrastructure
Protect intellectual property and sensitive system credentials.

Advanced UAM

Monitor what matters

- ✔ Monitor only specific users or actions; exclude private apps/URLs
- ✔ Record users' screens and get searchable metadata — even offline
- ✔ Preserve privacy with pseudonymization and sensitive data masking

Prevent and stop threats

- ✔ Set custom alerts and response parameters
- ✔ Get real-time notifications on unusual activity
- ✔ Warn users, revoke access, or block suspicious actions

Get full visibility

- ✔ Control USB device connections across all endpoints
- ✔ Track keystrokes, commands, and clipboard use
- ✔ Monitor file uploads in messaging apps and browsers

Deliver actionable insights

- ✔ Generate over 30 types of detailed user activity reports
- ✔ Schedule reports for email delivery and use during audits
- ✔ View productivity, idle time, and app/web usage at a glance

The widest platform support available

UNIX vmware aws CITRIX

Why choose Syteca UAM?

- Deploys fast — on-prem, SaaS, or hybrid
- Scales to thousands of endpoints
- Flexible, needs-based licensing
- Low TCO, no hidden fees

The choice of 1,500+ companies worldwide
