

Intelligent PAM

with built-in Identity Threat Detection and Response (ITDR)

Fast to deploy

Easy to scale

Built on powerful PAM controls, Syteca goes beyond access approval to show you **what happens after access is granted**. Gain the control that legacy PAM solutions lack: identify critical blind spots, address access-driven risks, and promptly respond to threats with a single, unified platform.

Control access and every user account

- ✓ Detect and onboard unmanaged privileged accounts
- ✓ Provide just-in-time access with approvals and time-bound permissions
- ✓ Verify user identities with 2FA
- ✓ Ensure secure access for remote users and vendors

Monitor activity in real time and detect threats

- ✓ Capture session video recordings with searchable metadata
- ✓ View sessions in real time
- ✓ Get alerts on risky user activity
- ✓ Enable privacy-first monitoring with real-time sensitive data masking

ITDR-centric PAM

Manage workforce credentials

- ✓ Secure passwords and access keys in an encrypted vault
- ✓ Automate password rotation
- ✓ Deliver secrets without exposing credentials to users
- ✓ Securely share passwords with team members

Promptly respond to and investigate incidents

- ✓ Terminate processes and block users violating security policies
- ✓ Automate threat response actions
- ✓ Investigate events with session playback and searchable logs
- ✓ Export tamper-proof recordings as forensic evidence

Why choose Syteca?

Get started quickly
thanks to the platform's simple architecture.

Adapt the platform
to your unique security needs with highly configurable controls and deployment options.

Simplify daily operations
with an intuitive interface and straightforward configuration.

Expand seamlessly
as your environment grows, without performance trade-offs.

Enjoy predictable operating costs
with flexible licensing and no hidden fees.

Meet cybersecurity requirements
with robust access controls and comprehensive audit trails.

The widest platform support available

UNIX

vmware

aws

CITRIX®

Built for your environment

High performance

Avoid slowdowns and scale as your business grows thanks to our lightweight agent.

Easy integrations

Connect to SIEM systems, SSO providers, and ticketing tools with ease.

Multi-tenancy support

Separately manage geographically distributed teams and departments as needed.

Responsive support

Resolve issues quickly with help from our 24/7 support team.

Deploy your way

On-premises

for full control and customization

SaaS

for easy scaling and automated maintenance

Hybrid

for flexibility and cost efficiency

Certified and recognized by the best
