

# Identity Threat Detection and Response (ITDR)

Monitor user activity inside privileged sessions and stop identity threats in real time.

## Protection beyond the access point, with no bolt-on integrations

With ITDR as one of the Syteca cybersecurity platform's solutions, you can see exactly what privileged, regular, and third-party users do after login and take immediate action against identity threats.

### Why it matters

- 01** Identity is the #1 attack vector
- 02** Access control alone isn't enough
- 03** Compliance demands evidence

#### Monitor sessions

- ✓ Record privileged sessions with on-screen activity
- ✓ Capture session context: apps, commands, URLs, keystrokes, and more
- ✓ Limit vendor session duration to reduce exposure window
- ✓ View high-risk sessions in real time

#### Detect threats

- ✓ Receive alert notifications in real time
- ✓ Spot risky user activity and privilege misuse
- ✓ Use default or custom alert rules
- ✓ Detect off-work logins based on an AI-established baseline
- ✓ Integrate alerts with SIEM systems

### Syteca ITDR

#### Respond & investigate

- ✓ Terminate sessions, stop suspicious processes, and warn users of violations
- ✓ Respond automatically or manually, with no integration lag
- ✓ Generate 30+ user activity reports
- ✓ Investigate sessions and search by user, keyword, time, IP, app, alerts, and other parameters
- ✓ Export tamper-proof evidence for audits

#### Control access

- ✓ Discover and control every privileged account
- ✓ Secure and deliver employee credentials through an encrypted vault
- ✓ Enable controlled password sharing and automated rotation
- ✓ Provide secure access for vendors and remote users

*\*Access control is available with Syteca PAM enabled*

## The widest platform support available

UNIX

vmware

CITRIX

## Why choose Syteca?

### Fast deployment

with easy setup and no technical hassle

### Flexible licensing

to fit your business and security needs

### Predictable costs

with no hidden fees and low TCO

### Dedicated support

with 24/7 access and customer training

### Easy scalability

to fit mid-market and large enterprises

### Smooth integration

with Active Directory, SIEMs, SSO, and ticketing systems

**Ensure compliance** with the NIS2, HIPAA, SOX, GLBA, NIST 800-53, PCI DSS, and more

## The choice of 1,500+ companies worldwide

"Honestly, it's the first tool we've rolled out that didn't confuse people."

*Head of infrastructure of a healthcare organization*

## Deploy your way

### On-premises

for full control and customization

### Cloud

for easy scaling and low maintenance

### Hybrid

for flexibility and cost efficiency
